

DESIGN FACT SHEET

FRAME

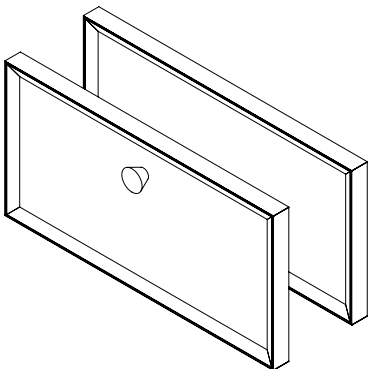

In FRAME, nature's rich and varied colour scheme brings warmth and vitality to a tactile, oak-led kitchen. Sturdy wood panels and robust joinery are built for the lasting storage of the things you reach for every day.

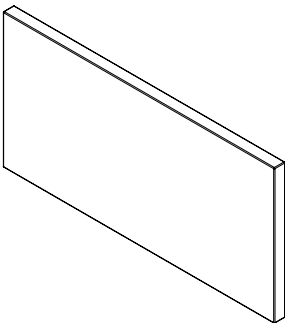

FRAME lets time-honoured Scandinavian design meet a contemporary, human-centred approach — the clean lines of the north, warmed up. In simpler terms: it makes you want to reach out and touch wood.

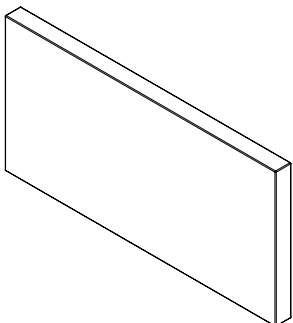

Doors

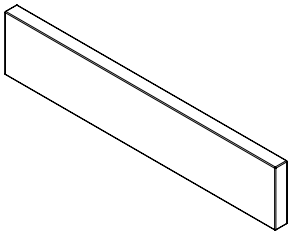

Drawers

Cover panels

Inserts

Plinths

FRAME by Note is made from wood veneer placed on robust particleboard. The kitchen design comes in two variants: Wood veneer and Painted veneer. Wood version in color Dark Oak has been treated with hard wax oil containing a brown pigment that causes the lines in the wood to be visible in an understated manner. Small color differences may occur in the veneer and the hard wax oil will accentuate these differences, creating a vibrant and rustic surface. The Painted veneer variant is available in Soft White and Blue, and the lines in the wood structure are visible, giving the kitchen a vibrant and natural finish.

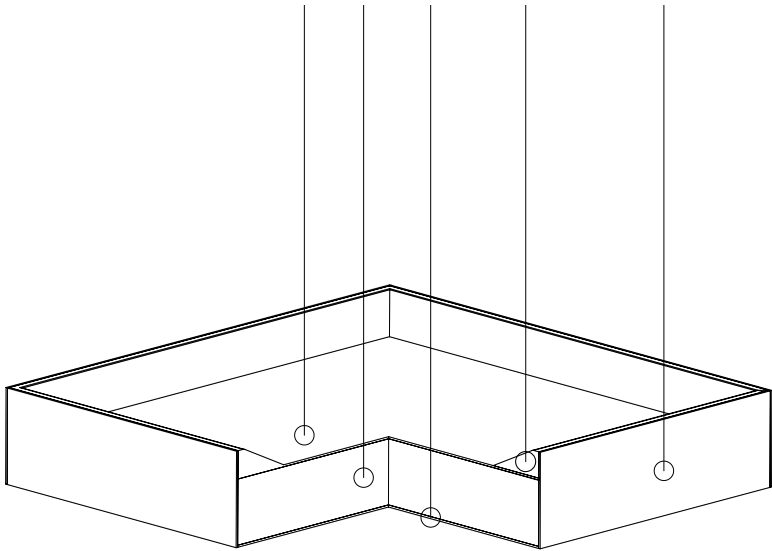

WOOD VENEER—Dark Oak

PAINTED VENEER—Soft White

PAINTED VENEER—Blue

Doors, Drawers and Blinds

Total thickness 23 mm / 29/32"

Corners and edges Radius 1 mm / 1/32"

Grain direction Vertical

Surface treatment Ground oil and hard way oil

A – Front	0.5 mm / 1/32" engineered wood veneer
B – Core	16 mm / 21/32 chipboard
C – Back	0.5 mm / 1/32" engineered wood veneer
D – Edgeband	0.5 mm / 1/32" veneered European oak
E – Frame	solid wood European oak

Please note that measurements may vary according to material tolerances

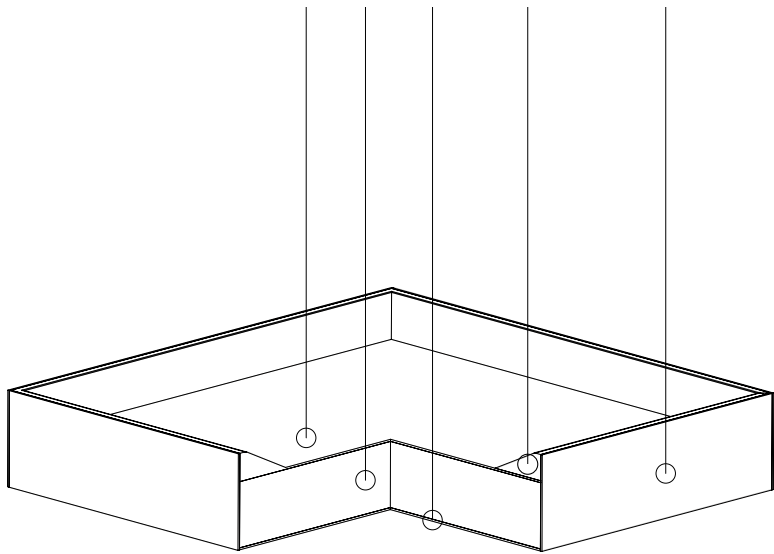

Cover Panels, Inserts and Plinths

In the FRAME design, all cover panels have been designed with a special thickness of only 16 mm / 21/32" in the effort to frame the fronts elegantly.

Apart from the special thickness, cover panels, inserts and plinths are identical in construction to the fronts with a surface of wood veneer and a core of chipboard. These elements come without the triangular pre-drilled holes.

Care and maintenance

The fronts in wood veneer can be cleaned with normal, mild household detergent. Remember to finish off by wiping with a dry soft cloth. In addition, a biannual treatment with hard wax oil is recommended for the Dark Oak oiled design version.

Doors, Drawers and Blinds

Total thickness 23 mm / 29/32"

Corners and edges Radius 1 mm / 1/32"

Grain direction Vertical

Surface treatment Painted (Polyurethane, two component, gloss 20)

A – Front	0.5 mm / 1/32" veneered European oak
B – Core	16 mm / 21/32 chipboard
C – Back	0.5 mm / 1/32" veneered European oak
D – Edgeband	0.5 mm / 1/32" veneered European oak
E – Frame	solid wood European oak

Please note that measurements may vary according to material tolerances

Cover Panels, Inserts and Plinths

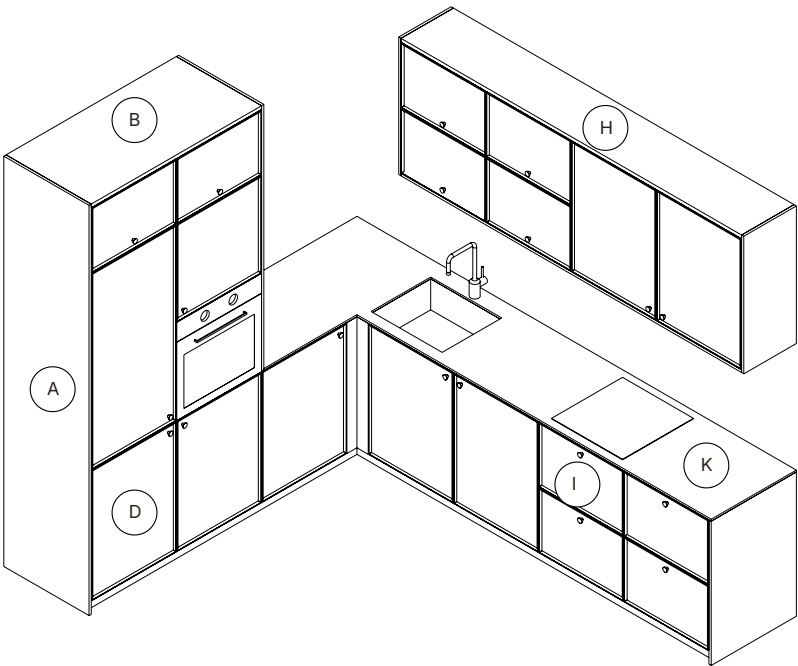

In the FRAME design, all cover panels have been designed with a special thickness of only 16 mm / 21/32" in the effort to frame the fronts elegantly.

Apart from the special thickness, cover panels, inserts and plinths are identical in construction to the fronts with a surface of wood veneer and a core of chipboard. These elements come without the triangular pre-drilled holes.

Care and maintenance

The fronts in painted veneer can be cleaned with a soft cloth wrung out in water and normal, mild household detergent. Remember to finish off by wiping with a dry soft cloth.

Design recommendations

The designer recommends choosing a height for all side panels (A) that frames the design by covering the plinth to the floor. Furthermore, the designer recommends adding cover panels below and above (H) wall cabinets as well as above high cabinets (B) to create the framed look throughout the kitchen.

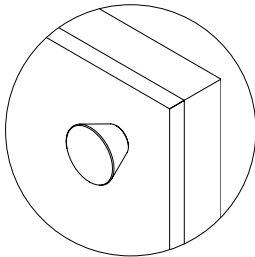

Handle specifications

Materials	Brass Metal
Dimensions	Diameter 30 mm / 1 3/16"

For the FRAME design, we recommend choosing cabinets and wooden drawers in natural oak to complete the natural, tactile look and feel — the combination is great for the fronts in Dark Oak, but even better for the colored variant as the natural oak will subtly complement the visible wood structure on the fronts.

Countertop recommendations

Note recommend getting the Corian countertop (K) for the FRAME design. A dynamic and versatile material with an undulating color spectrum, the Corian countertop matches the design holistically in the chosen nuances Willow and Cacao Brown. Alternatively, consider Dekton in Zenith White, for a refined and durable finish.

Handles

The design is conceived as a push-to-open solution. However, handles are recommended for any built-in appliances. Choosing handles for all fronts is also an option.

The FRAME handle comes in brass and stainless steel with a dimension of 30 mm / 1 3/16" in diameter and 17 mm / 11/16" in depth.

The handles are purchased separately and mounted externally by the customer to pre-drilled drillings. The handle position is typically positioned in the center of the top on drawers (I) and in one of the corners on doors (D).
