

DESIGN FACT SHEET

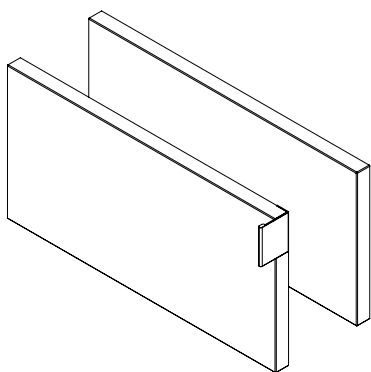

MATCH

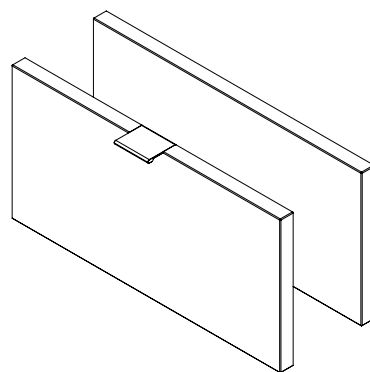

INTRO

MATCH works at the intersection of art and design, mixing materials, aesthetics and practices to surprisingly captivating effect.

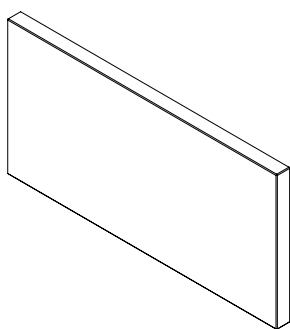

Unorthodox elements — the durable, wax-like polyethylene traditionally used for cutting boards — are set against classic but playful features like brass handles and a lush marble countertop. MATCH is built to be as tough and resilient as it is extraordinary.

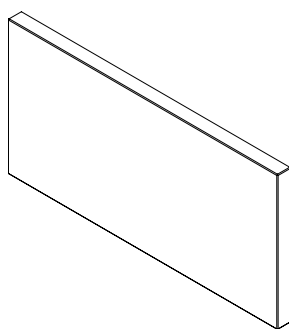

Doors

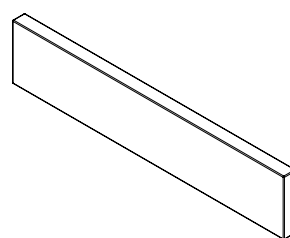

Drawers

Cover panels

Inserts

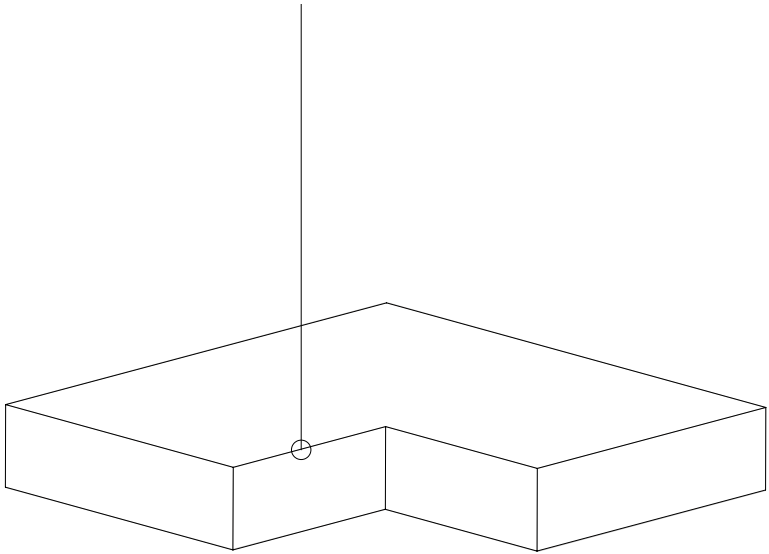

Plinths

The MATCH fronts come in six bold, striking nuances: white, blue, peach, green, red and brown. The colors can be combined according to personal taste, which adds to the kitchen's distinctive character and expressive look.

The material comes without surface treatment, making the design raw and honest in a tactile and textural way. The material has traces from the production process and minimal scratches from the handling of the material.

HDPE – Multiple colors

Doors, Drawers and Blinds

Total thickness	20 mm / 25/32"
Corners and edges	Chamfer 1x1 mm / 1/32 x 1/32"
Surface treatment	Circular brushed

A – Front	20 mm / 25/32" solid high-density polyethylene (HDPE)
B – Core	–
C – Back	–
D – Edgeband	–

Please note that measurements may vary according to material tolerances

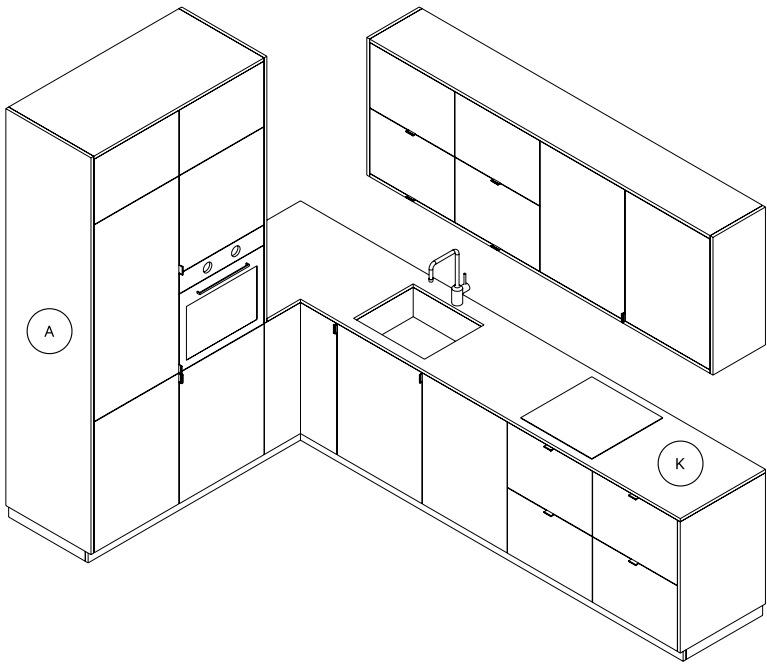

Cover Panels, Inserts and Plinths

Cover panels and inserts are designed to match the material and thickness of the fronts. The plinths are available in brass and stainless steel with a thickness of 20 mm / 25/32". The core material is MDF, while the surface and edge of the plinths are laminated with brass or stainless steel.

Care and maintenance

The fronts can be cleaned with a soft cloth wrung in warm water and normal, mild household detergent. Remember to finish off by wiping with a dry soft cloth.

Design recommendations

As the name suggests, MATCH is conceived as a design you can mix and match to create an expression that suits your personal preferences.

The designer recommends choosing side panels (A) in a height that leaves a glimpse of the plinth from the side.

Complete the MATCH kitchen with cabinets and steel drawers in white to create a calming contrast to the vibrant fronts.

Handle specifications

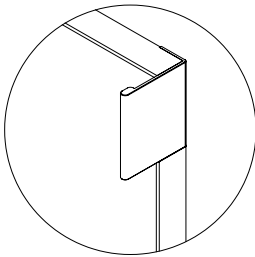

Variants	Satin gold (anodised aluminium)
	Stainless steel (anodised aluminium)
Dimensions	50 mm / 1 31/32"

Countertop recommendations

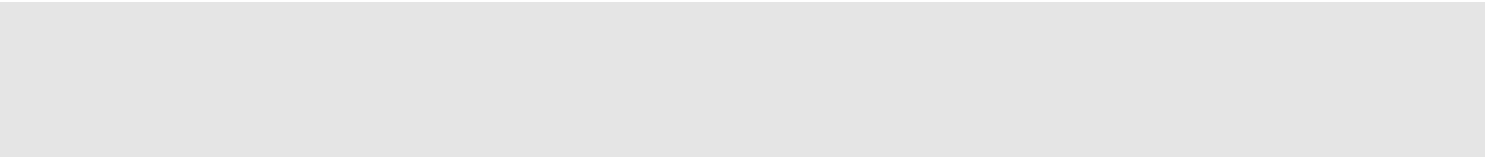

The designer recommends a countertop (K) cut from the marble types Calacatta Viola or Bianco Carrara, type C, as an elegant contrast to the more graphic HDPE material. The countertop is also available in HDPE.

Handles

Choose a push-to-open solution or add the external MATCH handle to the design. The handles are available in two varieties and designed to match the plinths: a satin gold aluminum handle and an aluminum handle. Both variants have been treated to prevent patination. The handles are mounted externally by the customer into pre-drilled millings in the door.
