

DESIGN FACT SHEET

PROFILE

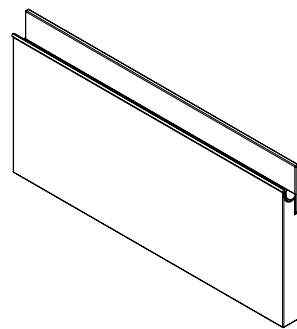

In PROFILE, a monochrome scheme meets a lasting aesthetic designed to sit seamlessly inside the architecture around it.

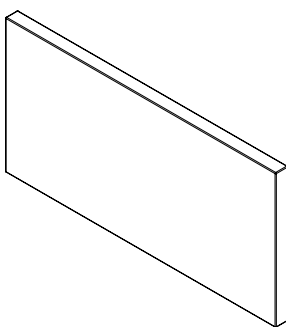

The collection takes its name from the rounded aluminium profile that protects the front from wear and impact. That profile is a new reading of the classic integrated handle and the functional centre of the design — understated but hard to look away from, and the thing that ties the kitchen together in a calm expression of warm textures.

Cover panels

Inserts

Plinths

PROFILE comes in three different varieties: Painted, Dark Oak and Natural Oak. The design comes in different materials and colors for both fronts and handles, creating a versatile and flexible design.

The handle is an integrated, rounded aluminum profile, which has given the design its name. It has been designed to last and withstand wear, tear and other types of impact. The integrated handles come in 4 different finishes: The White (powder-coated aluminum), and three anodized aluminum: 'Golden Metal', 'Silver Metal' and 'Dark Metal'.

The Painted version comes in five timeless matte nuances with a glossiness of 10%—and can be paired with a corresponding nuance of a countertop in FENIX NTM laminate. The Dark Oak and Natural Oak varieties are made from quarter sliced European oak veneer and come with a surface treatment of a matte, lacquered gloss. The lacquer contributes to less maintenance and more durability, and it lets the material retain the natural look through a low gloss finish.

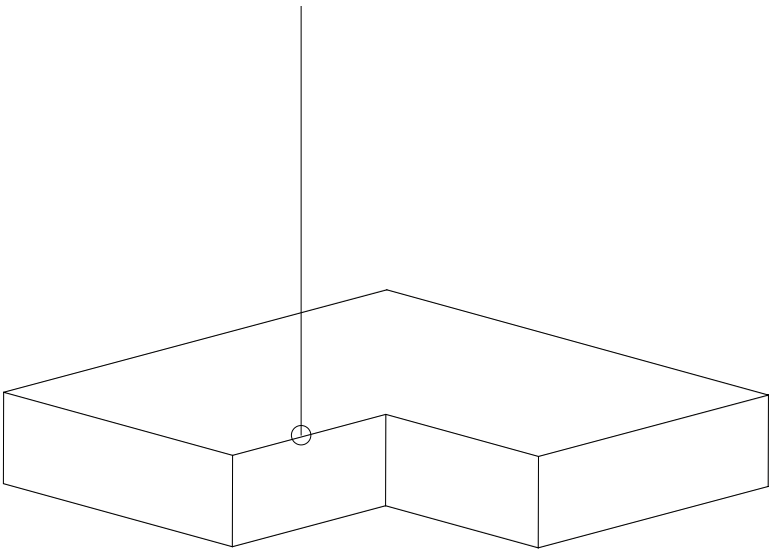

PAINTED – Multiple colors

OAK – Natural

OAK – Dark

Doors, Drawers and Blinds

Total thickness 23,5 mm / 59/64"

Corners and edges Radius 1 mm / 1/32"

Surface treatment Painted (Polyurethane, two component, gloss 10)

A – Front	22 mm / 7/8" painted standard MDF
B – Core	–
C – Back	–
D – Edgeband	–

Please note that measurements may vary according to material tolerances

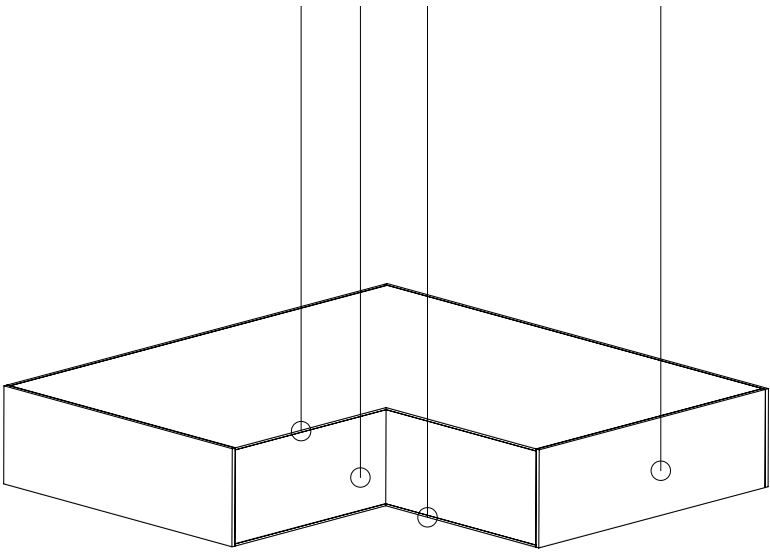

Cover Panels, Inserts and Plinths

In the PROFILE design, all cover panels and plinths have been designed with a special thickness of 19 mm / 3/4".

Apart from the special thickness, cover panels, inserts and plinths are identical in construction to the fronts with a matte painted surface on top of chipboard. Inserts come in a thickness of 23 mm / 29/32".

Care and maintenance

The painted fronts can be cleaned with a soft cloth wrung in warm water and normal, mild household detergent. Remember to finish off by wiping with a dry soft cloth.

Doors, Drawers and Blinds

Total thickness	24,5 mm / 31/32"
Corners and edges Radius	1 mm / 1/32"
Grain direction	Horizontal
Surface treatment	Natural oak: Matte clear lacquer (gloss 10) Dark oak: Dark stain color and matte clear lacquer (gloss 10)
A – Front	0.5 mm / 1/32" veneered European oak
B – Core	22 mm / 7/8" standard MDF
C – Back	0.5 mm / 1/32" veneered European oak
D – Edgeband	1 mm / 1/32" veneered European oak

Cover Panels, Inserts and Plinths

In the PROFILE design, all cover panels and plinths have been designed with a special thickness of 19 mm / 3/4".

Apart from the special thickness, cover panels, inserts and plinths are identical in construction to the fronts with a surface of lacquered, veneered oak on a core of chipboard. Inserts come in a thickness of 23 mm / 7/8".

Care and maintenance

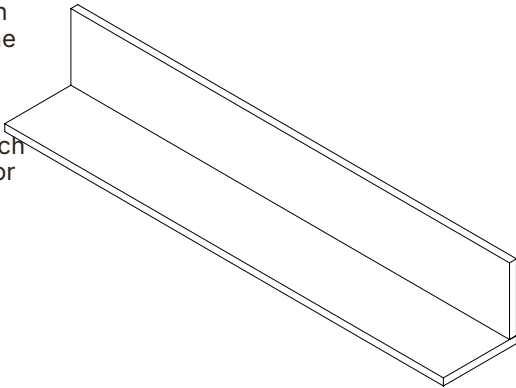

Fronts in veneered oak are finished off with a matte lacquer; a protective treatment that makes the surface easier to clean and more wear-resistant. Fronts in oak will take on patina over time changing the color of the oak into a warmer color. Dark oak may lighten due to UV exposure.

The lacquered, veneered fronts can be cleaned with a soft cloth wrung out in warm water and normal, mild household detergent. Remember to finish wiping with a dry soft cloth.

Please note that measurements may vary according to material tolerances

For the PROFILE design, the designers have created an open shelf to match the kitchen. The shelf comes in a range of standard lengths, and all have the same composition in materials and thickness as the fronts. The shelves are mounted with concealed floating shelf brackets.

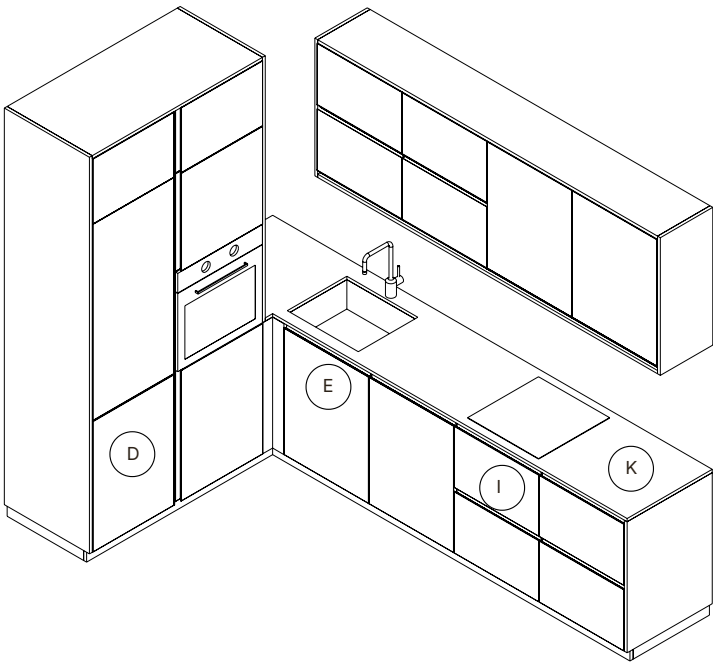

Available in all the same finishes and colors, you can choose a shelf to match the PROFILE kitchen – or combine the kitchen with a shelf in a different color from the design series.

Shelves

Variants	White, Sand, Gray, Dark-gray, Dark Anthracite Natural oak, Dark oak
Material	19 mm / 25/32" standard MDF
Depth	200 mm / 7 7/8"
Heights	200 mm / 7 7/8"
Lengths	80, 100, 120 cm / 24, 30, 36, 39, 48"
Restrictions	Max weight 15 kg / 33 lbs per shelf. Please only mount the shelves on a brick or concrete wall.

Design recommendations

PROFILE is a flexible design with a wide range of colors and options to suit your taste and needs. Even the PROFILE handle is flexible; while the handle is fixed at the top of all drawers (I), you can choose between a handle on the side (D) or in the top (E) on doors for lower cabinets. For doors on high cabinets with built-in appliances, the handle will always be positioned horizontally.

The PROFILE design is completed with cabinets and wooden drawers in either natural or smoked oak for oak fronts—but it's also a great combination for the painted fronts due to the natural and warm color tones.

Handle specifications

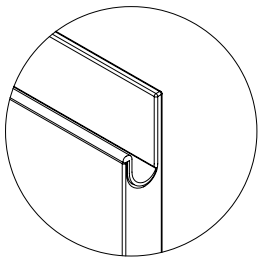

- Golden Metal (Anodised aluminium)
Silver Metal (Anodised aluminium)
Dark Metal (Anodised aluminium)
White (Powder coated aluminium)

Countertop recommendations

The PROFILE countertops (K) come in two inviting, durable varieties: Fenix laminate and Ceramic. The laminate tops are made from Fenix NTM laminate, an exceptionally soft and smooth surface, and they have been chosen in matching colors and edges for a tone-on-tone expression.

The ceramic tops are available in six muted, natural tones for a seamless finish, and they are made from a type of extremely versatile ceramic, which can tolerate extreme temperatures without getting burned or cracked.

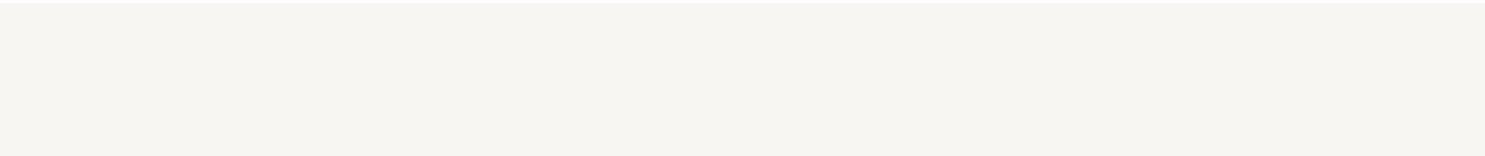

Handles

The integrated handle features a slightly extruded and rounded aluminum profile milled into the front either on the sides or the top/bottom depending on the product.

The integrated handles come in four different finishes: White (powder-coated aluminum), and three finishes in anodized aluminum: 'Golden Metal', 'Silver Metal' and 'Dark Metal'.
